

YOUR NEON SOURCE

A large, stylized neon sign logo for 'FENSIL' is centered on the page. The letters are formed by thick, white neon tubing with rounded ends, set against a dark background. The entire logo is enclosed within a thick, orange-red neon border that follows the shape of the letters. The logo is tilted slightly upwards from left to right.

World's largest selection of neon tubing colors

COATED LEAD GLASS COLORS

EGL has introduced more new colors in the last five years than any other source – stunning, saturated colors such as Flamingo, Tropic Green, and Seacrest – a total of over 70 colors now in stock for immediate shipment. (16 of these colors shown on previous page)

EGL PHOSPHOR COATINGS DRAMATICALLY BOOST ADHESION, BRIGHTNESS, AND COLOR STABILITY

EGL phosphor coatings combine special adhesives, the world's finest phosphors, and a range of proprietary ingredients – specially processed, uniformly coated, baked, and annealed in computer-controlled ovens at 1000°F.

These unique formulations provide unmatched adhesion, uniformity, brightness, and long-term color stability, without flaking, washout, ripples, specks, or darkening of the bends (even with shades of blue).

At EGL, tubing is individually straightened, fire-polished, washed, and dried using EGL's special Semi-Dry process to eliminate residue contamination. It is then coated, baked, and annealed, reducing glass stress and strain.

The world's finest phosphors, proprietary adhesives, and special additives combine to provide unmatched brilliance and consistency without flaking, even at the tightest bends.

ACCUWALL®: THE COLORED GLASS TUBING THAT'S EASY TO BEND

EGL's ACCUWALL® machine-drawn colored glass tubing is available uncoated, or coated with EGL's rare earth phosphors to achieve the most intense, saturated neon colors attainable.

In addition, ACCUWALL® colored glass offers consistent wall thickness and outside diameters for easier bending and sturdier, longer-lasting signage and lighting.

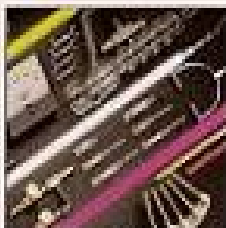

World's largest manufacturer of neon tubing, electrodes, and rare gases

EGL manufactures a comprehensive range of high-performance neon products that set new industry standards for processing efficiency, color brilliance, and long-term reliability.

- World's largest selection of neon tubing colors
- World's largest selection of advanced electrodes
- Complete selection of advanced processing equipment
- Full line of bending equipment and torches
- High-efficiency MAXI-VAC® manifold and complete pumping system
- Complete line of tube supports, including GRAB-IT™ wire-free supports
- Rare gases and blends, 99.999 percent pure

Over 12,000 sign shops in 75 countries now specify EGL. To meet demand, EGL has expanded its ultra-modern facility to 80,000 square feet adding state-of-the-art production equipment and quality control systems.

For the ultimate in high-performance neon products, insist on EGL from your local distributor, or call for the name of a stocking EGL distributor near you.
